

Crossroads Holdings, Inc.

## Disclosure Statement

### Pesticide Use

[updated: February 26, 2024]

- Big Daddy Purp Corp d/b/a Crossroads Holdings Inc. (tier 3 cannabis producer and processor license 416893) operates an outdoor farm.
- From time to time, pesticide products may be required to eliminate insects on or near our cannabis harvest during the vegetative stage of plant growth.
- Management will assess all situations and, in the event pesticides are required to eliminate an infestation, we shall designate the area and plants where the infestation is present (by using ribbon or other markers to identify the designated area), apply LCB approved pesticide product according to the instructions, and label the area (“Sprayed with [name of product] on [date]”).
- We shall follow the instruction on the pesticide product in which is applied to our cannabis plants.
- We shall follow WAC regulations and may proceed to sell such cannabis product as flower, but not as material that can be reduced to oil (such as fresh frozen) until the material passes a quality control laboratory test and meets the LCB’s requirement of approved pesticide levels.
- We use the WSAG forms required by the Department of Agriculture.
- All pesticide logs and records shall be updated accordingly.
- All inventory and cannabis weight logs and records shall be updated accordingly.
- We shall operate in accordance with WAC 314-55-08 (Pesticide action levels).
- A list of pesticides we may use are: Trittek, Dipel DF, Des-x, Suffoil-X.
